

^{13}C - ^{15}N TEDOR spectrum of human prion 23-144 fibrils

Darryl Aucoin, 2015

Department of Chemistry and Biochemistry | The Ohio State University

Field strength: 800 MHz

Why is this your favorite spectrum?

I enjoy this spectrum because the shape of the peaks reminded me of some type of animal. I remember first noticing this while analyzing data late one evening with a coworker and commenting "that region looks like a dog!"
