

Serum sample obtained from a Takayasu's arteritis patient

Ashish Guleria, 2015

NMR-Based Metabolomics Department | Centre of Biomedical Research (CBMR)

Field strength: 800 MHz

Why is this your favorite spectrum?

The 2D ^1H - ^{13}C HSQC spectrum was used to resolve the overlapping signals and helped us to identify the discriminatory metabolites unambiguously.

The assigned ^1H - ^{13}C HSQC spectrum of human serum sample.
