

Serum sample

Dinesh Kumar, 2015

NMR-Based Metabolomics Department | Centre of Biomedical Research (CBMR)

Field strength: 800 MHz

Why is this your favorite spectrum?

Like electrocardiogram in cardiology, the NMR spectrum of serum sample obtained from an acute myocardial infarction (AMI, or so-called heart attack) patient can be used to predict the severity of the attack and its timely clinical management.

This spectrum has been referred to here as "metabocardigram."
