T-2 mycotoxin (15.7 mg) in MeOD

Henning Sören Schmidt, 2015

Institute of Food Chemistry | Westfälische Wilhelms-Universität Münster

Field strength: 400 MHz

Why is this your favorite spectrum?

T-2 toxin is my current field of science interest, and it gives a nice and simple spectrum. However, in this piece of work it is more about making the spectrum appear as a cardiogram for a T-shirt print, for instance.
