HSQC of beta gamma crystallin from ciona intestinalis

Sujeesh Sukumaran, 2015

Solid State Structural Chemistry Department | Indian Institute of Science

Field strength: 800 MHz

Why is this your favorite spectrum?

Peaks in this spectrum are well spread and in good shape. It was recorded with only four scans, and the spectrum looks like a star map.

I looked at this spectrum so many times and each time I look at it I could draw different animals by joining the dots (the last time it was a fox).
