

*2.5 mM lone doripenem*

**Heath Rose, 2016**

Chemistry and Biochemistry Department | University of Notre Dame

**Field strength:** 700 MHz

**Why is this your favorite spectrum?**

This double-quantum filtered COSY is one of my favorite spectra because of the COSY multiplets and its symmetry. Also, it kind of looks like a bird, or a plane, but sadly not Superman. I like the colors, too... go Irish!
