

nMR is **ART**

3D ^{13}C NOESY of a protein

Eva Madland, 2017

Biotechnology and Food Science Department
Norwegian University of Science and Technology

Field strength: 800 MHz

Why is this your favorite spectrum?

The automatically generated axis in TopSpin was not good enough, so the signals decided to make their own arrow to show the increase in chemical shifts. And also, with a little imagination you can see either a koala bear or a man with glasses next to the arrow.
