*Phenylspirodrimane derivative (3.3 mg) in DMSO-d<sub>6</sub>*

**Annika Jagels, 2017**

Institute of Food Chemistry | Westfälische Wilhelmsuniversität

**Field strength:** 600 MHz

**Why is this your favorite spectrum?**

This unknown phenylspirodrimane derivative is the first compound which I isolated from a *Stachybotrys* species within my PhD studies. Interestingly, it is a symmetric homologous dimer with fluorescent properties. #believe
