

3 IDP samples overlaid, 370 μ M in Nap and NaCl buffer, pH 6.5

Morkos Henen, 2017

Molecular Genetics Department
Anschutz Medical Campus, University of Colorado

Field strength: 900 MHz

Why is this your favorite spectrum?

The overlay between the full-length IDP in red and two small fragments of the same protein (green and violet) looks perfect and shows how NMR is the method of choice to study IDPs on an atomic level.
