ART

*"Making of NMR Arts"*

**Bernd Diehl, PhD, 2014**

CEO, Spectral Service AG | Köln, Germany

**Why is this your favorite spectrum?**

No doubt, NMR is high science but also great art! The "Making of NMR Arts" started with time and frequency domain spectra of ethanol, then "designing" these spectra in Photoshop. I then painted the designed spectra in acryl on wood (100×120 cm). For the canvas I used the wooden walls of the Bruker 600 cryo NMR instrument. Both paintings are part of my NMR art gallery; a wine label using a combination of both pictures was created in Photoshop for our 25<sup>th</sup> anniversary celebration. Isn't it real fine art?
