

Human dihydrofolate reductase bound to NADPH

Lisa Tuttle, PhD, 2012

Biochemistry Department | University of Washington

Field strength: 800 MHz

Why is this your favorite spectrum?

This is a CHD₂ selective CHSQC but used for a sample grown on 10% ¹³C in water. This is a very nice way to get those stereospecific assignments of methyl groups.

Comments: It's so pretty.
