

My heart beats COSY

Hatice Mutlu, PhD, 2014

IBG-3 Polymer Chemistry Department | KIT

Field strength: 500 MHz

Why is this your favorite spectrum?

The idea of this NMR experiment was to take H,H-COSY of the final product after long and tedious purification process. While the result was not scientifically the desired one, the isolated COSY data made my day as a passionate person for contemporary art. Hence, COSY made my heart feel GOOD!
